

Planning

Serious software for serious retailers.™

A photograph of a retail store interior. On the left, there is a rack of hanging clothes, including a green jacket and a white top. In the center, a yellow handbag sits on a white shelf. To the right, a yellow hat is also on a white shelf. The background is a plain, light-colored wall.

Plan, budget, track and forecast

A simple to use full-featured tool for pre-season and in-season forecasting.

Retail Pro Planning is a sophisticated and easy to use decision support tool used to create Merchandise, Store and Assortment plans. It is a merchandise planning system integrated with Retail Pro POS, Store Operations and Merchandising. Retail Pro Planning includes weekly stock, sales and intake forecasting; integrated business intelligence and the scalability to meet your needs for store-level merchandise plans.

FEATURES:

- Fully integrated with Retail Pro
- Plan and track KPIs including sales, markdowns, OTB, inventory, turns, supply and ROI
- Pre-season and in-season merchandise and store planning
- Spreadsheet-styled data entry capability
- Customizable workflows to guide users through the steps of plan, re-plan, approve
- Customizable hierarchies (time, product and location)
- Advanced Store Planning features such as Store Grading, Store Attributes, Sales Density, etc.

BENEFITS:

- Create assortment plans down to the store level
- Optimize product mix at the store level
- Reduce inventory costs
- Eliminate reams of spreadsheets
- Improve cash flow management
- Increase the number of inventory turns
- Increase sales
